Write up to 3 sentences about this picture in your workbook. Use the sentence recipe to make your sentences more interesting.

SENTENCE RECIPE:  
Character, **what they are doing** what is around them.

**EXAMPLE:** The explorers **read the book of mysteries** in the woods.

### Mathematics

**Task 1 – Number Quiz**  
Complete the number quiz.

**Task 2 – Length**  
If you can, watch the video by clicking the link below.

[Length: Recording Lengths](#)

using [Decimals](#)

**Length Activity Sheet**

Complete length activity sheet.

Write up to 3 sentences about this picture in your workbook. Use the sentence recipe to make your sentences more interesting.

SENTENCE RECIPE: Character, **what they are doing** what is around them.

**EXAMPLE:** The astronaut **floated towards the blue planet**.

### Mathematics

**Task 1 - Subtraction**  
If you can, watch the video by clicking the link below.

**Subtraction:** [Learn to subtract 4-digit numbers from 4-digit numbers with regrouping.](#)

[YouTube](#)

An exclamation mark indicates strong emotions such as anger, fear, love etc.

**Examples:**  
Arghhh! There's a spider!  
Help! Help!  
I'm so excited about the party!  
Watch out!

**Task 1 - Write what the characters in the pictures are saying.** Make sure you use a sentence that needs an exclamation mark.  
The first one's done for you.

**Task 2 – Draw someone who has won a prize.** Write what they are saying. Don't forget to use exclamation marks!

### Mathematics

**Task 1 – Multiplication**  
If you can, watch the video by clicking the link below.

[Multiplication Mash Up - A Fun Way to Learn Your](#)

[Multiplication Facts!](#)

[Bing video](#)

**Multiplication activity sheet**

Make sure you complete the first two columns. Feel up for

Write up to 3 sentences about this picture in your workbook. Use the sentence recipe to make your sentences more interesting.

SENTENCE RECIPE:  
Character, **what they are doing** what is around them.

**EXAMPLE:** The little girl **learnt every word** in the dictionary.

### Mathematics

**Task 1 – Division**  
Make sure you complete the first two columns. Feel up for a challenge? Give the third column a go.

**Task 2- Word Problems**  
Complete the word problems activity sheet.

Write up to 3 sentences about this picture in your workbook. Use the sentence recipe to make your sentences more interesting.

SENTENCE RECIPE:  
Character, **what they are doing** what is around them.

**EXAMPLE:** I **stepped towards** the mysterious and dusty bookcase.

### Mathematics

**Task 1 – Friday Fun Day**  
It is the last day of Term 3.

You should be super proud of all the great work you have done this Term. To have some fun complete the attached maths investigations.

**Task 2 - Complete your** Mathematics activities for today.

# What did you eat today?

If you take a trip to the Western Plains Zoo at Dubbo, NSW, you'll see the beautiful big Bengal tigers. Their natural habitat is in India and South-east Asia where they hunt deer, wild oxen and cows, and even attack crocodiles. At the zoo, life is very different. Here is the daily ration for two Bengal tigers.

### Bona

Young male — starve days on Wednesdays and Saturdays

5 kg horse meat or beef or 3 chickens supplemented with:

25 g  $\text{CaCO}_3$  — calcium carbonate — for strong teeth and bones;

25 g Feramo Greyhound powder (an iron supplement given to racing greyhounds);

5 g thiamine (vitamin B).

Bones to be offered when available — at least once weekly.

### Johnny

Very old male — no more starve days

8 kg horse meat or beef or 3 chickens supplemented with:

50 g  $\text{CaCO}_3$ ;

25 g Feramo Greyhound powder;

5 g thiamine.

Bones to be offered when available — at least once weekly

After you have read the diet for the two Bengal tigers, answer the questions below.

1 Where do these Bengal tigers live now? \_\_\_\_\_

2 What are the three types of meat the tigers could have each day?  
\_\_\_\_\_

3 How do you think the supplement of calcium, greyhound powder and thiamine would be given to the tigers each day?  
\_\_\_\_\_

4 Which tiger is given the most calcium? \_\_\_\_\_

Why do you think that is necessary? \_\_\_\_\_

5 Johnny is too old to have starve days. Why do you think Bona isn't fed on Wednesdays and Saturdays? \_\_\_\_\_  
\_\_\_\_\_

6 What is the only other difference in the diet of the two tigers?  
\_\_\_\_\_

7 There is a *knackery* near Dubbo. How would that benefit the Western Plains Zoo? \_\_\_\_\_

8 What does this diet tell you about Bengal tigers? Tick the correct statement.

They are herbivores.

They are carnivores.

They are omnivores.

**Stop press**

Johnny died from old age just as this book was finished. All the staff at the zoo were very sad.

**After you've finished**

If you'd like to know more about the Bengal tigers you could write to:

Western Plains Zoo  
Education Centre  
PO Box 831, Dubbo NSW 2830  
Phone: 02 6882 5888  
Fax: 02 6884 1722  
Website: [www.zoo.nsw.gov.au](http://www.zoo.nsw.gov.au)

Unit 26

# Welcome to Kangaroo Island

1 There are three ways the boys and their grandparents can travel to Kangaroo Island.

a By fast ferry from Glenelg to Kingscote.  
Mark it on your map like this.  
-----

b By passenger and vehicular ferry from Cape Jervis to Penneshaw. Mark it like this.  
.....

c By plane from Adelaide to Kingscote.  
Mark it like this. +- +- +- +- +- +- +- +-

2 Jonathan and Toms' grandparents want to take their car. Which of the three ways would they travel to the island?

3 They've decided to stay at Brownlow the first night. It is marked a little south-west of Kingscote. Name it on your map.

4 The boys and their grandparents have decided where they'd like to camp. Find these camping places on your map and name them.

a Cape St Albany and Cape Willoughby are the most easterly points on Kangaroo Island. Cape St Albany is north of Cape Willoughby. Mark both on your map.

b Vivonne Bay is on the south coast near Seal Bay.

c Snake Lagoon is on the west of the island near the mouth of Rocky River.

d West Bay is the most westerly camping ground on the island.

e Scott Cove is on the north west point of the island.

5 By looking at the legend and the map write what things the family could do at, or near, each of these places.

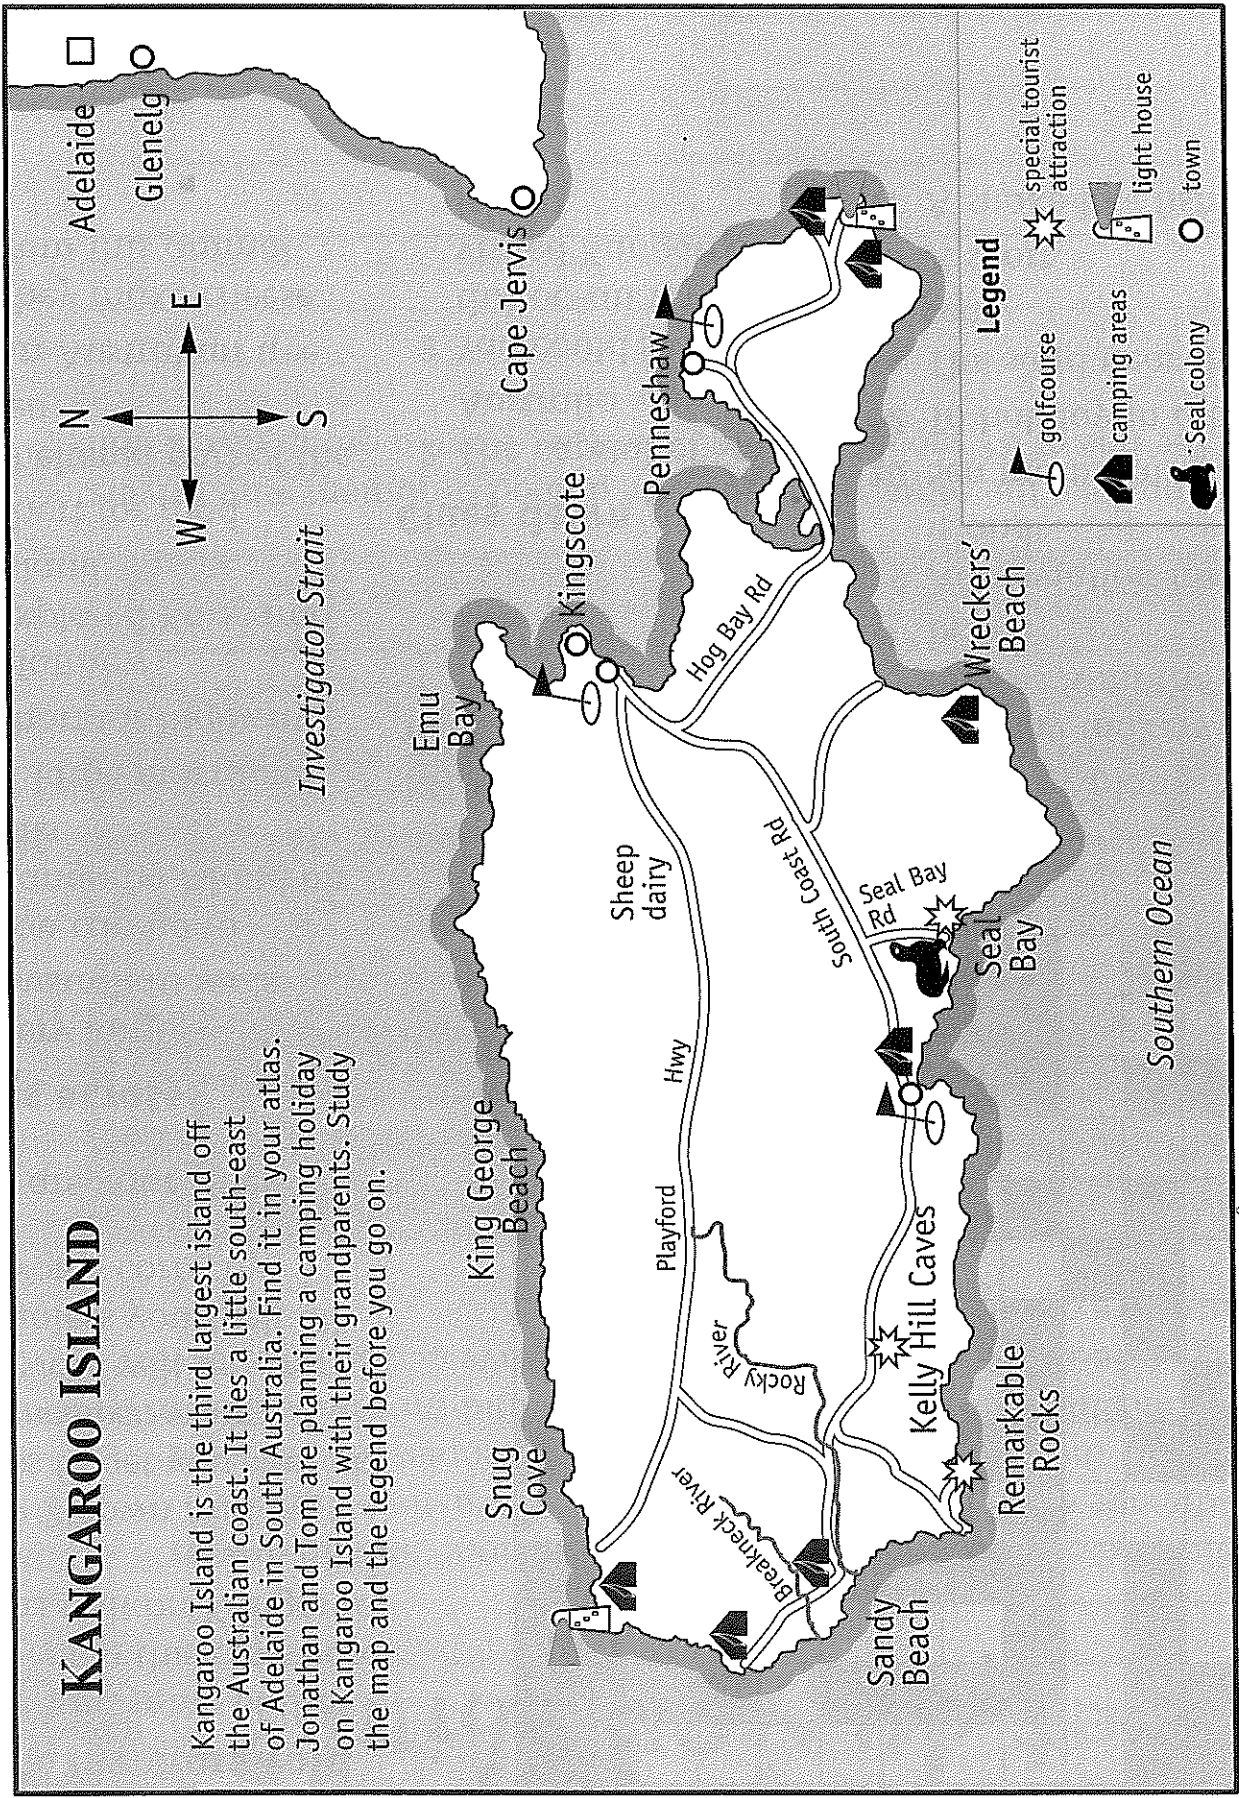

a Vivonne Bay \_\_\_\_\_

b Snake Lagoon \_\_\_\_\_

c Scott Cove \_\_\_\_\_

# KANGAROO ISLAND

Kangaroo Island is the third largest island off the Australian coast. It lies a little south-east of Adelaide in South Australia. Find it in your atlas. Jonathan and Tom are planning a camping holiday on Kangaroo Island with their grandparents. Study the map and the legend before you go on.

## Crack the crossword

You'll find some of the answers to this crossword in this unit on Kangaroo Island.

Try 2 down and 4 across to get you started.

*Remember:* your crossword will not work out unless you spell all the words correctly.

Here are your clues.

### Clues across

- 1 Very large Australian seals
- 4 You can go to Kangaroo Island on this
- 6 A large marsupial
- 7 Short for highway
- 8 Matthew \_\_\_\_\_ explored Kangaroo Island
- 11 Short for road
- 13 Sheltered part of the sea
- 15 An Australian tree
- 16 They make cheese from this animal

- 18 Australian cockatoo
- 19 A piece of land jutting out into the sea.

### Clues down

- 2 The capital of South Australia
- 3 You could swim in this ocean if you visited Kangaroo Island

- 5 To go by plane
- 8 Holiday makers can do this from the beach
- 9 Abbreviation for island
- 10 Sea mammals
- 12 To holiday in a tent
- 14 The sand near the sea
- 15 A sport
- 17 A snake-like fish

Wednesday

**Read Aloud Comprehension**  
*A Tale of Two Beasts*

Listen to and watch 'A Tale of Two Beasts' read aloud on YouTube.

**Answer the following questions:**

What did the girl put on the small creature's head

---

---

---

Was the small creature happy to be taken from the woods? Why do you think so?

---

---

---

---

What is the difference between part one and part two of the book?

---

---

---

---

Why is it important to try and understand other people's point of view?

---

---

---

---

# Thursday What do you think?

Ayrelie's class have been discussing the question: 'Should drivers over the age of 85 lose their licences?' This discussion started because in the state where they live, elderly peoples' licences are automatically cancelled when they turn 85 and they are asked to sit for an annual test. Ayrelie and her friends have decided this is very unfair. Here are their reasons.

We think that people over 85 should **not** lose their licences just because of their age. These are our reasons:

- 1 Who would do their shopping?
- 2 If they wanted to go to the club, who would take them? They mightn't live near a bus stop and taxis are very expensive. They would have to depend on other people.
- 3 Some elderly peoples' husbands or wives might have died, and then they can't even drive to see a friend.
- 4 It wouldn't be a good 85 birthday present to lose your licence.
- 5 They aren't even the age of the drivers who have the most accidents. It is the drivers under 25 who have those!

Now you take the other side and write a good argument why drivers over the age of 85 *should* lose their licences. Have a group discussion first.

# The Australian sea lion

The Australian sea lion is one of the world's rarest seals, with a population of only about 12 000. Australian sea lions live along the southern and western coastline, mainly on islands (see map below). They are mammals, belonging to the family of eared seals. They are different from other seals as they have external ears. The male, or bull, is dark all over with a cream coloured mane. The female, or cow, is silver-grey with a pale underbelly.

Other seals wriggle, lunge and bounce on land.

Sea lions walk on all four flippers. They are more agile in the water using their front flippers as oars and their hind flippers as rudders. They spend about three days at a time at sea, diving for squid, octopus, fish and prawns. They deliberately swallow stones called *gastroliths*, but why remains a mystery. When the female is ready to give birth she returns to land. Seven or eight days after the birth of her pup she mates again with the bull. But this fertilised egg doesn't start growing for another 6–9 months. This

gives her time to suckle and care for her pup. About seventeen months after mating her second pup is born.

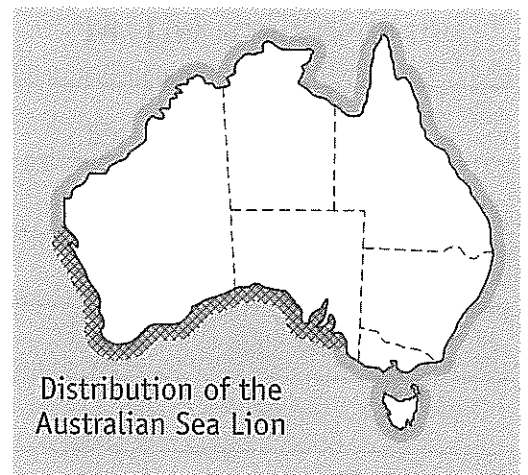

During the early 1800s, hunters nearly wiped out the Australian sea lions. Today they are protected but the population is still recovering. Seal Bay on Kangaroo Island is home to about 600 of these wonderful animals. Go and see them for yourself sometime.

Use these facts to write an interesting report on the next page. Add drawings where you have enough space.

**Dad**  
Weight to 400 kg  
Length to 2.4 m  
Life span 20 years

**Mum**  
Weight to 100 kg  
Length to 1.8 m  
Life span 12 years

Distribution of the Australian Sea Lion

**Classification**

What group of animals do sea lions belong to?

**Description**

What do they look like?

**Diet**

What do they eat?

**Breeding**

How do they reproduce?

**Movement**

How do they move on land and in the water?

**Habitat**

Where do they live?

**Another interesting fact**

**Monday Reading Task 3: Book Week Reading**

Design a new front cover for your favourite book.

A large, empty rectangular box with a thin black border, intended for the student to design a new front cover for their favourite book.

**Tuesday Reading Task 3: Book Week Reading**

Create and label a map for an imaginary world. It could be based on a world from a book you have read or one that you have made yourself.

### Thursday Reading Task 3: Book Week Reading

Write a letter to the author or illustrator of your favourite book.

Dear \_\_\_\_\_,

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Yours sincerely,

---

*Christina*

**Friday Reading Task 2: Book Week Reading**

Write a blurb for your favourite book.

---

---

---

---

---

---

---

---

---

---

---

---

Now draw an illustration to match the blurb.

A large, empty rectangular box with a thin black border, intended for a student to draw an illustration that matches their book blurb.

# Wednesday

## Commas in Lists

When writing a list, you should put a comma between each item, except for the last item where you use 'and'.

For example: "I need to go to the supermarket to buy eggs, milk, bread, sugar and orange juice."

**Read the sentences below and add the missing commas:**

1. My dad and I like to go fishing swimming and hiking on the weekend.
2. Jonas likes to watch movies play games and take naps.
3. Katie talks to her mum dad brother and sister.
4. Orange blue purple and green are my favourite colours.
5. Can you call John Jake and Jenny?
6. We will go to the beach the park the pool and the aquarium.
7. Fred Frank and Freda are all going on a vacation!
8. I can't wait for Friday Saturday and Sunday.
9. I want to ride my bike run in the park and swim this summer.

Name: Friday Spelling Test. Term 3, Week 10

| 20. |                 |

## WRITING – MONDAY

This week we are going to be writing another information report on a country. The country we will be writing our information report on is Australia. We will still be following the same steps, gathering our information, putting it in a graphic organiser and then using this information to write our paragraphs.

Read through the information report on Australia below. The information is all jumbled up, without subheadings. Use different coloured pencils/highlighters to find information on the following: **location, the people, food, First Nations Peoples and other interesting facts.**

Then put this information into the appropriate boxes in the graphic organiser.

Here is the type of information you should be looking for under each category:

|                                 |  |
|---------------------------------|--|
| <b>Location:</b>                | Which continent is Australia in? What is the capital city? What are the major landmarks? |
| <b>The People:</b>              | What is the population? What language do they speak? What sports are popular?            |
| <b>Food:</b>                    | What are the popular or unique foods called? Give a brief description of each.           |
| <b>First Nations Peoples:</b>   | Information about Aboriginal and Torres Strait Islander people                           |
| <b>Other interesting facts:</b> | Information that doesn't fit into the other categories                                   |

## Australia

Australia is the only country in the world that is also a whole continent.

Tim Tams are an iconic Australian chocolate biscuit.

There are many different Aboriginal and Torres Strait Islander nations who all have different languages, customs, laws and stories.

The first people in the country now called Australia were the Aboriginal and Torres Strait Islander peoples.

Vegemite is an Australian spread made for going on toast and in sandwiches.

6% of Indigenous Australians are Torres Strait Islanders.

Australia has some of the world's most dangerous animals, including sharks, snakes and spiders. (Extension: can you name any dangerous Australian animals)

Australia is in the southern hemisphere, in the Australasian region.

Aboriginal and Torres Strait Islander cultures have been around for tens of thousands of years

The population of Australia is nearly twenty-six million. Aboriginal English is a language combining regional Aboriginal words with English. Some examples are "gammon" meaning "kidding" and "deadly" meaning "awesome.

The capital city is Canberra, but the largest city is Sydney.

The national language of Australia is English.

There were once around 250 Aboriginal and Torres Strait Islander languages. Today there are only 145. 110 of those still spoken today are critically endangered.

Important landmarks include Uluru, the Great Barrier Reef and the Sydney Opera House.

There are eight states and territories. (Extension: can you list all the states and territories of Australia)

Aboriginal English is a language combining regional Aboriginal words with English. Some examples are "gammon" meaning "kidding" and "deadly" meaning "awesome

Pavlova is an Australian meringue-based dessert, topped with cream and fruit.

Popular sports include Aussie Rules Football (AFL), cricket, soccer, Rugby League and swimming.

Butchers in Australia sell kangaroo meat as steaks and sausages meaning Australians eat their national animal.

Marsupials are a type of mammal, native to Australia that keep their babies in a pouch when they are born.

Torres Strait Islanders originally lived on the islands between Papua New Guinea and Cape York.

**Location**

**GRAPHIC ORGANISER:**

**Australia**

**First Nations Peoples**

**The People**

**Food**

**Other interesting Facts**

## WRITING – TUESDAY

Using your graphic organiser you completed yesterday, write your information report using the following subheadings:

### **Location**

### **The People**

Remember to write in full sentences and use correct sentence punctuation. You will continue to write your information report tomorrow.

### **Location**

---

---

---

---

---

---

---

---

---

---

### **The People**

---

---

---

---

---

---

---

---

---

---

## **WRITING – WEDNESDAY**

Using your graphic organiser you completed, continue writing your information report using the following subheadings:

### **Food**

### **Other Interesting Facts**

Remember to write in full sentences and use correct sentence punctuation You will continue to write your information report tomorrow.

### **Food**

---

## **WRITING - FRIDAY**

Have one of your parents or older siblings to check your work.

Did you have any spelling mistakes?

Did you miss some punctuation?

Can you use more descriptive words?

Once your work has been checked, edit using a different colour and try to improve your information report.

Can you draw a picture here that could go with one of your paragraphs?

# LENGTH

When we measure things that are in metres and centimetres it is useful to record such lengths in decimal notation. Remember that  $1 \text{ cm} = \frac{1}{100} \text{ m}$ . This can be written as 0.01 m. So if we measure something that is 1 metre and 36 centimetres long, we would write it like this:

**Task 2:** Write these measurements using decimal form. Remember to use  $.$  to represent the decimal

a) 1m and 69 cm =  m

b) 2m and 91 cm =  m

c) 3m and 23 cm =  m

d) 4m and 16 cm  m

e) 19m and 27cm =  m

**Task 3:** Write these measurements as cm:

a) 2.34m =  cm

b) 3.67m =  cm

c) 4.98m =  cm

d) 5.09m =  cm

e) 9.45m =  cm

# NUMBER OF THE DAY

**Activity 4: Optional**- you can choose to complete this or move on to your next learning activity. Your number for today is **775**.

Double click in each box to enter your answers.

## Number of the Day

Today's number is

# PATTERNS

**Task 1: Find what the rule is to each of these number patterns.  
The first one has been done for you:**

a)

|   |   |    |    |    |    |                              |
|---|---|----|----|----|----|------------------------------|
| 4 | 8 | 12 | 16 | 20 | 24 | <b>RULE:</b> add 4 each time |
|---|---|----|----|----|----|------------------------------|

b)

|    |    |     |     |     |     |                                   |
|----|----|-----|-----|-----|-----|-----------------------------------|
| 79 | 90 | 101 | 121 | 132 | 143 | <b>RULE:</b> <input type="text"/> |
|----|----|-----|-----|-----|-----|-----------------------------------|

c)

|    |    |    |    |    |     |                                   |
|----|----|----|----|----|-----|-----------------------------------|
| 34 | 50 | 66 | 82 | 98 | 114 | <b>RULE:</b> <input type="text"/> |
|----|----|----|----|----|-----|-----------------------------------|

d)

|     |     |     |     |     |     |                                   |
|-----|-----|-----|-----|-----|-----|-----------------------------------|
| 545 | 533 | 521 | 509 | 497 | 485 | <b>RULE:</b> <input type="text"/> |
|-----|-----|-----|-----|-----|-----|-----------------------------------|

e)

|     |     |    |    |    |   |                                   |
|-----|-----|----|----|----|---|-----------------------------------|
| 150 | 121 | 92 | 63 | 34 | 5 | <b>RULE:</b> <input type="text"/> |
|-----|-----|----|----|----|---|-----------------------------------|

# TIMES TABLES

Optional- you can choose to complete this or move on to your next learning activity.

## Times Tables

Help Multiplication Max fill in the multiplication table below.

Type your answer directly in to each box.

|    | 0 | 1  | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10  | 11 | 12  |
|----|---|----|----|----|----|----|----|----|----|----|-----|----|-----|
| 0  |   |    | 0  |    |    |    |    |    |    |    |     |    |     |
| 1  |   |    |    |    |    |    |    | 7  |    |    |     | 11 |     |
| 2  |   | 2  |    |    |    | 10 |    |    |    | 18 |     |    |     |
| 3  |   |    | 6  |    |    |    | 18 |    |    |    | 30  |    |     |
| 4  | 0 |    |    | 12 |    |    |    |    | 32 |    |     |    | 48  |
| 5  |   |    |    |    | 20 |    |    |    |    | 45 |     |    |     |
| 6  |   |    | 12 |    |    |    | 36 |    |    |    |     | 66 |     |

| $8 \times 7 =$<br>$56 \div 7 =$     | $59 \div 5 = r$ | $2127 \div 3 =$ |

# WORD PROBLEMS

Read these word problems. Then write a number sentence to match the word problem and solve the number sentence.

EXAMPLE NUMBER SENTENCE:  $45 + 9 = 54$

1. Kayla went to the shops and bought 86 cupcakes for her birthday party. 39 cupcakes were pink and the rest were blue. How many blue cupcakes did she buy?

NUMBER SENTENCE: >>>>>>

2. Erin was helping her dad pick some apples on the farm. Her dad picked 223 apples and Erin picked 65 apples. How many apples were picked altogether?

NUMBER SENTENCE: >>>>>>

3. James was making some lolly bags for his party. He wanted to give each guest 6 lollies each. If there were 11 guests coming to his party, how many lollies would he need for his lolly bags?

NUMBER SENTENCE: >>>>>>

4. Henry had been saving his birthday money to buy a new bike. He had saved \$548. If his bike cost \$364, how much money would he have left over?

NUMBER SENTENCE: >>>>>>

5. At Glendore Public school there are 658 students. On one day, there were 289 students away. How many students were still left at school that day?

NUMBER SENTENCE: >>>>>>

# NUMBER OF THE DAY

**Activity 4: Optional**- you can choose to complete this or move on to your next learning activity. Your number today is **1200**.

Double click in each box to enter your answers.

## Activity 2:

# Sticks

Collect a number of sticks. The investigation is to find the maximum number of intersections as the sticks cross.

With one stick, no sticks cross.

With 2 sticks, there is one intersection.

**Question 1:** With 3 sticks, how many intersections are there?

Record the maximum number of intersections for each number of sticks.

| Number of Sticks | Number of Intersections |
|------------------|-------------------------|
| 1                |                         |
| 2                |                         |
| 3                |                         |
| 4                |                         |
| 5                |                         |
| 6                |                         |

**Question 2:** Can you spot the pattern?

**Questions 3:** Can you explain the reason for the pattern?

# NUMBER OF THE DAY

# How do people use the natural environment in everyday life?

1. Look around the room you are in. Write down all the things that need electricity to work. Think about school and your whole home and add to that list.

---

---

---

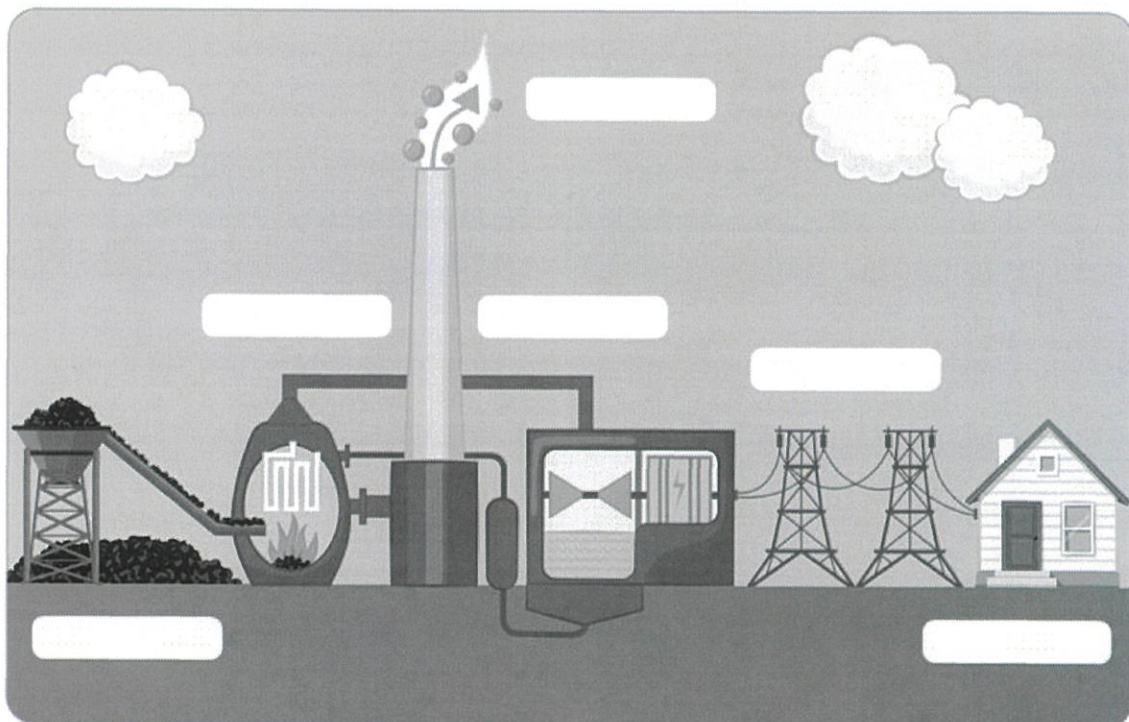

---

---

---

---

2. Electricity is made when coal is mined underground, processed, and then sent to homes and businesses. Label the diagram showing the steps in the electricity production process.

- coal
- furnace
- power lines
- generator
- home/business
- steam turbine

3. Renewable energy is a natural resource that is better for the environment, and it won't run out. Read about different renewable energy sources and answer the questions.

## Renewable Energy Comprehension Activity

### What is renewable energy?

Renewable energy is energy that comes from sources that are easily made or naturally replenished (restored). We can't run out of renewable energy sources. Renewable energy includes solar, geothermal, wind, hydropower and biomass.

### What is solar energy?

Solar energy is the light and heat that comes from the Sun. Solar energy can be collected and used as electricity to power lights, appliances, electronics and other things that use electricity. Solar energy is collected by solar panels.

### Why is using renewable energy sources better for our environment?

Natural gas, coal, petroleum, oil and uranium are all examples of fossil fuels that we burn to create energy. These sources of energy are called non-renewable because once they've been burnt, they're gone and do not naturally restore or fill up again. When we burn fossil fuels, we release harmful chemicals into the air and this is damaging to our environment.

Renewable energy doesn't cause any chemicals to be released into the environment.

### What is geothermal energy?

Geothermal energy is created from the heat inside the Earth. You can find it anywhere on the Earth's surface but sometimes you need to drill down through rock to find it.

### What is wind power?

Have you ever seen those huge, white windmills? They are called wind turbines and they harness energy from the wind. Wind farms can power entire villages. The bigger the turbine, the more electricity it generates.

### What is hydropower?

Hydropower (or hydroelectricity) is energy created from running water.

### What is biomass energy?

Biomass energy is energy that is created from living or once-living things. The most common biomass material used for energy is plants, wood and waste.

### Why are non-renewable energy sources still used?

We still use non-renewable energy sources today. The most common non-renewable energy sources used are coal, natural gas and petroleum. Because they generate more energy, can be stored and moved and are cheaper to convert into electricity than renewable sources, non-renewable energy sources are still very valuable and widely used.

# Questions

Please answer using complete sentences.

1. Sort the following energy sources into renewable and non-renewable using the table below.

- biomass   coal   natural gas   water   sun  
uranium   oil   wind   geothermal   petroleum

| Renewable | Non-renewable |
|-----------|---------------|
|           |               |
|           |               |
|           |               |
|           |               |
|           |               |

2. What types of renewable energy have you seen before?

---

---

---

3. Finish the visual dictionary. Draw a picture to match the energy with its source.

| Solar | Geothermal | Hydropower | Windpower | Biomass |
|-------|------------|------------|-----------|---------|
|       |            |            |           |         |

4. Think about your own home and family. What kinds of energy do you use for day-to-day living?

---

---

---
